# Who is the real MVP of NBA in Season 2016-2017

Bowen Sun, M4119c

# About Data

This project visualizes data from the 2016-17 NBA regular season.

- ◆ In NBA, the best defense is a good offense.
- ◆ Scoring is the best way to show offense ability of player.
- ◆ In the recent two seasons, who won the scoring title, who got the MVP.

So I select data TOP30 player of point per game (PPG) as a reference in MVP competition

# About Project

This project consists of two parts:

- ◆ The table will fully display the ability of TOP30 player (PPG).
- ◆ The chart will compare the performance on offense and defense of every player in TOP30 with their average.

# Why NBA

I've been a big fan of NBA more than 20 years. I witnessed the performance at the end of Jordan's incredible career. Then NBA became an important part of my life. In these recent years, NBA league encouraged offense. Offense ability is becoming a standard which can measure the value of a player. So I select it to show the relationship between scoring title and MVP.

# Thanks for your attention
